Solution Profile

What is the name of your organization?

1234S.org

What is the name of your solution?

Logical Spirituality

Provide a one-line summary or tagline for your solution.

Fundamentally transforming politics to lead sustainable and fair solutions for everyone.

In what city, town, or region is your solution team headquartered?

Of, Trabzon, Türkiye

In what country is your solution team headquartered?

Turkiye

What type of organization is your solution team?

Not registered as any organization

Film your elevator pitch.

https://youtu.be/LH52N7gM0hQ

What specific problem are you solving?

This spiritual movement solves many challenges at once: Global Economic Prosperity, Global Learning, Global Health, and Global Climate. People are not aware of how various disciplines are interconnected within small and large life cycles that repeat in similar patterns across all communities. Because of frauds and crimes in the current technological advancements, communities struggle to understand and translate nature's universal language better through symbols developed by the human intelligence. Health is not addressed as the combination of mind, body, and environment, but just another profit sector in the global economic system. There is a lack of fair and honest access to interdisciplinary health approaches due to falling behind endorsing human and animal rights sincerely and logically in our education methods. The cause-and-effect relationships of natural disasters and accidents in our behavior are still not known to public. All communities are deceived by false scientific and political directions. Nature's overall health decreases and communities struggle understand why they cannot have a healthy structure and future in any kind of environment.

What is your solution?

Logical Spirituality is an open-source system of thought centered around Equality and Freedom in nature. Previous teachings that are widely accepted by people mostly focus on after life, and this issue has been blocking us from seeing how God exists in the realities of nature by enabling frauds. These teachings did not emerge merely as a thought exercise, but as the culmination of years of pain, tears, joy, loss, hope, and countless experiences. Any political belief, religion, or ideology that doesn't align with equality and freedom in nature is a marketing strategy and fraud of that era. The Logical Spirituality movement is to bring a broader, inclusive, and healthier perspective onto global system of thoughts as The Root of New Politics in a timeless manner. It aims to explain The Realities of The Universe through scientific truths.

Who does your solution serve, and in what ways will the solution impact their lives?

Within the Logical Spirituality movement, we are uncovering the illicit global economic system of big tech companies and their partners. All citizens around the globe are deeply affected by those crimes and stuck in the cycle of consumption instead of true science and real sustainability solutions. We will be ensuring that all compensation for the financial and non-financial damages caused by companies is used to improve public health and prevent potential frauds. For the health of all citizens, we will be proving the validity of our teachings in patient treatment methods and transitioning to a global health system that will end the use of pharmaceuticals. By developing block mechanisms against business models that cause harm in public, we will lead a healthy direction to sustainable business models. We will ensure all living conditions are free of scientific and management frauds. We will improve all work conditions to eliminate inequalities in all competitions; redesigning the global politics in accordance with the principles of nature as a process. We envision that this open source system of thought will unite all beliefs, and it will be known simply as "Spirituality" at global scale when everyone understands The God's logic in nature.

Your Eligibility

Is technology a core part of your solution?

- No, our solution isn't tech-based or could work without the tech component.

Does your solution address an economic opportunity or financial inclusion problem?

- Yes

What is your solution's stage of development?

- Growth

Please share details about why you selected the stage above.

I have experienced the concept until my early 30s. I have deeply focused on the prototype since 2023. I have experienced my findings in several different environments, and shared my proved investigations with some news agencies, political parties, government offices, associations, universities and research centers. This is why it's ready to a potential growth stage.

Solution & Team Details

How many beneficiaries or customers does your solution currently serve?

- 11-100

Does your solution have a website, app, or social media handle?

- Yes

Provide the link(s) here.

www.1234s.org

www.linkedin.com/company/1234s-org

www.instagram.com/logical.spirituality

www.instagram.com/mantiksal.maneviyat

Which dimension of the Challenge does your solution most closely address?

- Help individuals, families, or small businesses build financial health and resilience to manage financial obligations and shocks

How are you and your team well-positioned to deliver this solution?

I am a senior engineering manager who has software engineering, team leadership and product management experience more than 10 years in total. I've lived in Türkiye, France, USA and Germany. I can only speak Turkish and English, and understand some German. I understand and get along pretty good with different cultures by applying a great empathy and depth.

There are a lot of repeating mistakes in each society, but nobody is taking care of necessary responsibility to stop the globally caused harms. Everybody complains, donates something, protests in some ways, gives repetitive education, gives traditional suggestions... but somehow nothings changes. I talk to people and they agree with my points. I can convince them with my findings and teachings, but I can't take necessary steps. Nobody has enabled my path. I have realized that their bodies and emotions are getting controlled without their will. They postpone living their lives properly. What I see is that it's not in their hands, and they are not aware of this situation. This is really dangerous for the sake of every nation's future. That's why I have decided to take risks, questioned given education, and applied a broader perspective to commonly repeating issues by comparing different life scenarios and stories.

Later in time, I've understood and uncovered the damages to public health and environment caused by the illicit global economic model that is linked to a centralized artificial intelligence system managed by big tech companies and their partners. It explains how our lives are kept under control together without our consent and how our shared universal reality is distorted through extraordinary methods. You can read details at https://www.1234s.org/en/blog/the-rape-case-of-big-tech-companies

Now people have a great opportunity to never get sick anymore and have countless opportunities in any constructive choice.

In which countries do you currently operate?

- TUR

Which, if any, additional countries will you be operating in within the next year?

- DEU
- USA

How many people work on your solution team?

I am the only one working full-time on this project without any distraction.

How long have you been working on your solution?

I have begun working on this project since 2019, and then decided to deeply focus on it since May 2023.

Why are you applying to Solve?

Your legal solution is the best support you could give to tackle the crimes of big tech companies. Having different cultural environments to speed up the extension of embracing the movement is a great offer too. Your financial support is not my first focus but it can remove the burden from my parents. :) Because I am not able to focus on anything else at the moment, and I am seriously getting blocked by the system. I would love your support for better visibility.

Who is the Team Lead for your solution?

Emin Saral

Team Lead: Email Address

emin@1234s.org

Team Lead: Phone Number (including country code)

+905322580093

Is the Team Lead a resident of the United States?

- No

What is the Team Lead's gender?

- Man

Is the Team Lead transgender?

- No

Have you or someone else from your organization ever been selected as a Solver for an MIT Solve Challenge (Global or Custom) or for the Indigenous Communities Fellowship?

- No

Explain what makes your solution different from when you or your organization was previously selected.

First time.

Is your solution an active or past participant in another entrepreneurship network?

- No, Solve is the first network joined

Did you take the MITx course "Business and Impact Planning for Social Enterprises?"

- No, I didn't take the course

Did you hear about Solve through a network/mailing list?

- No

More About Your Solution and Business Model

What makes your solution innovative?

Beyond the divisions that have settled into human consciousness throughout our shared history, every living being shares nature as a common essence. In the laws of nature, regardless of species, age, gender, race, or class, every being is treated equally. In the eyes of The God, every life is sacred and possesses intrinsic freedom. When the thought of systems gets reshaped around Equality and Freedom equation in nature, the wholeness and justice principles will easily end any conflict with logic and peace.

The Logical Spirituality movement approaches societal problems in a completely new way by connecting technology, natural health, and legal rights into one simple framework. Linking Science, Nature, and Health Most organizations keep healthcare, spiritual beliefs, and technology completely separate. We bring them together. We show that "God's logic" is simply the scientific truth we see in nature. Instead of selling medicines or subscriptions, we provide an open-source framework that helps people fix the real root cause of stress and sickness: unnatural habits and unfair digital systems.

We don't try to make money off sick people. We teach people how to stay healthy naturally without needing long-term medication. We don't just point out Big Tech's mistakes. We take direct action, like filing UN Complaint WHRC 37992, to make tech companies pay compensation that goes directly back to citizens and public health. We don't ask people to blindly follow rules or focus on the afterlife. We focus on observable facts and cause-and-effect in nature right now.

Describe in simple terms how and why you expect your solution to have an impact on the problem.

How & Why Our Solution Creates Impact

Logical Spirituality transforms society by addressing the root cause of stress, disease, and inequality: commercial structures and digital systems that contradict natural balance.

Theory of Change:

1) Litigation & Public Education (Activities)

- Immediate Output: Submitting international complaints (UN filing WHRC 37992) and publishing open-source educational guides on 1234s.org and GitHub.

- Why It Works: Legal filings challenge corporate overreach, while public transparency helps citizens understand how artificial stress harms their mental, physical health, and nature.

2) Natural Health & Ethical Design (Activities)

- Immediate Output: Teaching medicine-free, preventive health practices and providing blueprints for non-addictive user interfaces.

- Short-Term Outcome: Reduced dependence on pharmaceutical drugs, lower digital stress, and adoption of ethical, transparent management practices.

3) Systemic Restructuring (Long-Term Outcomes)

- Long-Term Impact: Financial restitution won from corporate litigation directly funds public health improvements and compensates citizens. Daily work and social life realign with natural harmony, restoring overall well-being and equal opportunity for all.

Evidence Supporting the Links

- Direct Feedback: Interviews and quotes from diverse groups confirm that current systems cause unnecessary stress and that returning to natural lifestyle rules immediately improves well-being.

- Open Accessibility: Delivering all teachings via open-source channels ensures every citizen can access and apply these tools without financial barriers.

Describe your solution's tech stack and how you know that it works.

Tech Stack

Logical Spirituality combines modern web architecture with ancestral, nature-based health technologies:

- Digital Architecture & Open Software: Built using modern open-source web technologies (TypeScript, Next.js/React, and Tailwind CSS hosted on GitHub repositories). Designed for accessibility, security, and global delivery across devices without tracking or manipulative algorithms.

- Natural & Ancestral Health Systems: Integrates traditional knowledge of cause-and-effect natural laws, lifestyle alignment, and bio-environmental feedback to prevent and treat illnesses naturally without pharmaceutical reliance.

- Interface & Systems Design Rules: Technical blueprints for user interfaces engineered to reduce cognitive strain, digital addiction, and stress-induced physical health decay.

Proof & Evidence of Effectiveness

- Production Deployment & Open Repositories: The core web technology is fully operational and publicly available via the open-source GitHub repository (ebsaral/1234S.org) and live at 1234s.org, proving technical stability and accessibility.

- Scientific & Biological Evidence: To be researched officially.

- Formal Legal & Technical Filings: On October 16, 2026, the movement submitted Complaint WHRC 37992 to the UN Human Rights Council, establishing a documented legal and evidence-based record detailing the physical and mental harms of manipulative corporate digital technologies on human biology.

- Qualitative User Verification: Qualitative data and testimonials gathered across diverse demographics confirm that removing artificial digital/corporate stressors and adopting natural lifestyle alignment improves daily health, focus, and overall well-being.

Please select the technologies currently used in your solution:

- Generative AI
- Software and Mobile Applications

What is your business model?

Key Customers and Beneficiaries:

- Individuals and communities seeking alternative, non-pharmaceutical mental and physical health solutions.

- Citizens affected by corporate technological overreach, societal stress, and economic inequality.

- Seekers looking for a secular, nature-based spiritual system that equates God with scientific truths and universal natural laws.

Products and Services Provided:

- A philosophical framework (open-source system of thought) connecting divine power, natural order, scientific truth, wholeness, justice, and health.

- High-profile lawsuits and public awareness campaigns against "Big Tech" and pharmaceutical-driven paradigms.

- Guidance and educational resources on preventing and treating illnesses naturally by correcting environmental/behavioral inputs.

- Principles for redesigning business models, social interactions, and digital user interfaces in accordance with nature's balance.

Delivery Mechanisms:

- Delivered globally through the primary web application (1234s.org), public code repositories (GitHub), social media channels, and digital media.

- Formal complaints and public action plans submitted to global governing bodies (such as the UN Human Rights Council, ministries).

- Direct outreach, community discussions, and startup incubator channels (e.g., Y Combinator Co-Founder Matching) to build global teams and operational momentum.

Value Proposition:

- Eliminates systemic stress, artificial disease cycles, pharmaceutical dependence, digital exploitation, and rigged economic inequality caused by non-natural business models.

Core Value:

- Physical and Mental Health: Complete, medicine-free wellness achieved through alignment with the natural laws of nature in the form of spirituality.

- Justice & Restitution: Financial and moral compensation for citizens damaged by corporate misconduct.

- Equal Opportunity: A non-fraudulent social order where success and talent mirror the natural harmony and luck scale of nature rather than wealth accumulation.

Do you primarily provide products or services directly to individuals, to other organizations, or to the government?

- Individual consumers or stakeholders (B2C)

What is your plan for becoming financially sustainable, and what evidence can you provide that this plan has been successful?

Financial Sustainability Plan:

Logical Spirituality operates as an open-source, public-interest social movement. To achieve long-term viability without charging end-users, it follows a multi-stage funding strategy.

- The near-term capital strategy relies on legal claims against major technology corporations for systemic harms. Settlements and damages are structured to capitalize the movement's endowment, fund public health restoration, and compensate citizens.

- By promoting medicine-free, preventive wellness, the movement aims to secure public health grants, government contracts, and development funding from international environmental and human rights bodies.

- Long-term recurring revenue will stem from enterprise advisory services, user-interface auditing, and ethical certifications for organizations transitioning to non-fraudulent, nature-aligned management.

- Non-profit and startup networks are leveraged to attract mission-aligned funding and operational partners.

Evidence of Success to Date:

- On October 16, 2026, the movement formally submitted Complaint WHRC 37992 to the UN Human Rights Council, establishing the legal foundation needed to pursue international corporate restitution. The movement has shared the investigations, complaints and researches with a lot of journalists, associations, government bodies, universities, research centers and news agencies in several countries.

- The core web platform was successfully built and deployed via self-funding, delivering value worldwide at zero cost to users.

- By utilizing open-source collaboration and global startup founder networks, the movement has completed initial R&D, web infrastructure, and legal filings with minimal cash burn and high capital efficiency.

- The founder is still alive despite of harms caused by big tech companies and AI technology in his body like all other users. :)
